HTML Forms

< Previous Next >

An HTML form is used to collect user input. The user input is most often sent to a server for processing.

Example

First name:

Last name:

```
PS C:\Users\nbehe\Music\MCA\SEM 1\Devops practical> python form_automation.py
Form filled and submitted successfully!
PS C:\Users\nbehe\Music\MCA\SEM 1\Devops practical>
```
